Full job description

The Company:

Our client is a family owned and operated business that provides metal fabrication services to a loyal base of repeat customers who appreciate personalised service and good quality locally designed & manufactured products.

The Role:

Reporting to the Production Manager, the primary focus of this role will be the skilful, effective and efficient design of new and innovative machinery. You will have the ability to think outside the square to bring innovative ideas and design to reality, you will bring to the table quality machinery design - listening to market intelligence and determining a fit for purpose result for customer demands. Additionally, you will have the capability to resolve issues and contribute to the fast-moving manufacturing environment that will see you build success.

What's in it for you:

- Work in a close knit team
- A fair and organised management team, who will always provide feedback
- Working for a family-owned business
- Flexible hours
